Voice Carry Over (VCO)

Connecting you with
important people in your life.

Kentucky Relay is a
24-hour service that
allows people who are Hearing,

Deaf, Hard of Hearing,
Deaf-Blind or Speech Disabled
to communicate with each
other via the telephone.

Through the use of specialized
equipment, relay users
communicate freely with
friends, family and businesses
who use a standard telephone.

Voice Carry Over (VCO) is an effective service for people who have a hearing loss and who use their voice on the phone.

VCO users speak directly to the person being called and, through specialized equipment, read what is spoken by the other party.

With VCO, you won't have to struggle to hear what others say over the phone and you enjoy the freedom of using your own voice.

Required Equipment: To make a VCO call, you will need either a TTY (text telephone, sometimes called TDD) or a device made specifically for VCO calls. This equipment will allow you to read telephone conversations on a screen and respond using your own voice.

Specialized VCO equipment can be obtained in a variety of ways. The Kentucky Relay Outreach Coordinator will be happy to assist you in locating equipment. Contact Kentucky Relay Customer Service: **1.888.662.2406 v/tty**.

Customer Profile

A Customer Profile allows you to customize your relay calls. Using a profile can ensure that all calls made and received via relay automatically connect in VCO.

There are a number of benefits when you create a Customer Profile including faster call processing, speed dialing, customized call greeting, improved typing speed, use of abbreviations, selection of long distance carrier, automatic VCO and others.

To create a Customer Profile, visit:

<http://www.hamiltonrelay.com/states/ky.htm> or contact Kentucky Relay Customer Service: 1.888.662.2406.

Making a VCO Call

Making a VCO Call Using a TTY

1. Place your telephone handset on the TTY and dial 7-1-1 or the toll-free number for Kentucky Relay: 1.800.648.6056.
2. When the Communication Assistant (CA) answers, type "VCO PLS GA." (NOTE: Having automatic VCO set up in your Customer Profile eliminates this step.)
3. After the CA answers with "VCO ON GA," provide the number you wish to call, then say "GA."
4. The CA types the response of the other person for you to read on your screen. Turn-taking continues in this manner until the call is complete.
5. If you wish to make another call, the CA is available after you have disconnected from your initial call. Simply tell the CA you want to make another call and provide the phone number.

Making a VCO Call Using a VCO Device

1. Connect to Kentucky Relay by dialing 7-1-1 or the toll-free number: 1.800.648.6056.
2. When the Communication Assistant (CA) answers, press the button that sends a recorded VCO prompt. (NOTE: Having automatic VCO set up in your Customer Profile eliminates this step.)
3. After the CA answers with "VCO ON GA," provide the number you wish to call, then say "GA."
4. The CA types the response of the other person for you to read on your screen. Turn-taking continues in this manner until the call is complete.
5. If you wish to make another call, the CA is available after you have disconnected from your initial call. Simply tell the CA you want to make another call and provide the phone number.

Examples of VCO devices include the Ameriphone and Uniphone.

"GA" (means "Go Ahead") is a term required on VCO calls for turn-taking purposes. "GA" ensures that the VCO user and the standard telephone user do not respond at the same time and miss each other's communication. When you say "GA," you will know it is your turn to talk. The same is true for the CA (before and after the call) and the standard telephone user, who will not reply until you say "GA."

Receiving a Call as a VCO User

When people want to reach you by phone, they can call through Kentucky Relay by dialing 7-1-1 or the toll free voice number: 1.800.648.6057. If you don't have a Customer Profile, you will need to answer incoming calls in one of two ways:

Answering Voice First

1. Pick up the handset and say "This is a VCO call GA." If you are using a TTY without a Y-jack or line splitter, you must put the handset onto the TTY immediately after you say "GA."
2. The CA will send his/her CA number and gender, followed by "VCO ON GA."
3. You may then speak directly to the caller, using "GA" to take turns.
4. The CA types the response of the other person for you to read on your screen. Turn-taking continues in this manner until the call is complete.

NOTE: If you prefer to keep the handset in one position for speaking rather than moving it to and from the TTY, you can use a Y-jack or line splitter. This allows the TTY and the telephone to be connected to the same line. The handset can remain in one position (either at your ear or holding it as a microphone), allowing you to speak into the phone and read the text with greater convenience.

Answering TTY First

1. Place the handset onto your TTY (unless you are using a VCO device or a Y-jack/line splitter) and type "VCO PLS GA." (NOTE: If you have a VCO device, simply press the "VCO MSG" button which sends a recorded VCO prompt.)
2. The CA will send his/her CA number and gender, followed by "VCO ON GA."
3. You may then speak directly to the caller, using "GA" to take turns.
4. The CA types the response of the other person for you to read on your screen. Turn-taking continues in this manner until the call is complete.

2-Line VCO

This enhanced relay feature offers you more control and allows for an interactive conversation without the use of "Go Ahead" ("GA") instructions. You can respond in real time and even interrupt, rather than wait for the other party to say "GA." Unlike typical relay calls, the CA does not identify the relay and is present only to type the voice of the standard telephone user. This service requires two telephone lines. For more information, visit: <http://www.hamiltonrelay.com/traditional/2lvco/index.htm>.

More information on VCO Calls

For more details on VCO calls, including how to place VCO-to-TTY, VCO-to-Speech-to-Speech calls, establish call set-up and to benefit from other convenient options, visit: <http://www.hamiltonrelay.com/traditional/2lvco/index.htm> or contact Kentucky Relay Customer Service: 1.888.662.2406.
